V12 FOOTWEAR ®

PLEASE CUT OR FOLD ALONG DOTTED LINE AND PLACE FLUSH AGAINST PART 1

PART 2

BEFORE YOU GET STARTED

Please print this on A4 at 100% size (with no scaling), to ensure the artwork is the correct scale. Printing this at the wrong size will result in incorrect feet measurements.

Once printed, please use a ruler to check that the distance between the indicated lines is exactly 170mm, if this is the case, please proceed. If this isn't the case, you may need to check your printer settings to ensure you're printing this at 100% size.

Please make sure you cut or fold along the dotted lines and place the two sheets together to ensure the feet silhouettes join together perfectly. You can always tape the two sheets together if you find this easier.

Once you have checked all the above and cut / folded your gauge, please place it flush against a wall. With your heels placed firmly against the same wall, please take your measurement from your biggest toe. If your feet are between sizes, go up to the next size.
